

Name: Example

Final Exam, April 27, 2017

Physics 152-000

THE HONOR CODE IS IN EFFECT FOR THIS EXAM – IT IS YOUR RESPONSIBILITY TO HELP MAINTAIN HONESTY AND FAIRNESS.

Instructions:

1. Complete any five of Problems 1 through 9 (and only 5). All count equally (20 points each). If you initially attempt more than five, then conspicuously cross out the solutions you do not wish to have graded by making a large X through the entire page.
2. Once you have completed the exam, also make an X through each problem you do not wish to have graded on the bottom of this cover sheet. If you work more than five problems and do not clearly indicate which problems NOT to grade then you will receive the LOWEST score from those you have completed.
3. **Write neatly and show your solution methods clearly.** Little or no credit will be given for answers that do not show how you got them.
4. Partial credit will be given if you have minor errors, but not for answers that incorrectly solve the problem.
5. Do your work for each problem on the page for that problem.
6. This exam is closed book and closed notes. You may use the summary sheets I provided.

Good Luck!
